# **POWER OF NATURE, SUPREMACY OF KNOWLEDGE**

The Hermitage company is renowned as a high-tech business both in Slovenia and abroad, which has built its standing with the highest quality of products and solutions for comprehensive external and internal protection against the effects of lightning and overvoltage, cable trays and mounting systems for photovoltaics.

## AN INNOVATIVE COMPANY WITH ITS OWN MANUFACTURE WITH A FOCUS ON THE CUSTOMER'S NEEDS

We are an innovation-oriented company which through its development and own production of products offers comprehensive customised solutions of the highest quality. The sales programme under the Hermi brand comprises top-quality lightning protection, surge protection, cable trays and mounting systems. The HERMI product range is the result of the company's commitment to development and continuous professional progress. With its long-term vision oriented to customers and business partners, the company strategically develops its innovative offer which stands out for its flexibility and versatility of use. We are proud to offer multiple solutions from our production range at a single point. Hereby, we assure our clients comprehensive expert technical support, timely delivery, and support with technical documentation.

“

We upgrade our business operations each year. This means that we must be better than the year before. The world keeps turning! And not only our competition is not sleeping, the expectations of our customers also grow each day. Our and also my focus is always to be a step ahead of our customers!

– Miran Rauter, Director

## **OUR MISSION AND VISION: years-long experience and innovative solutions to satisfy the needs of our customers**

We use our knowledge, experiences and innovative ideas to fulfil needs and wishes of our customers for high quality products. Using state-of-the-art technology we develop and produce the protection programme which sets new standards protecting the lives of individuals and property. Our own innovations help us to adjust the programme of cable trays and cable ladders to individual needs with type-adjusted elements. Our mounting systems programme provides simple assembly to our customers.

Through innovations and expertise we will continue to develop our Hermi trademark which is a result of over thirty years of successful operation. We have achieved a competitive advantage of a comprehensive, external and internal lightning protection and quality and advanced production of cable and mounting systems, and thus we will in particular focus on challenges of internationalisation of our operation. We wish to become a leading provider of external and internal lightning protection, cable trays and cable ladders and own professional solutions, increase our market share in other European countries and focus on countries beyond Europe's borders.

## **OUR STRATEGY: an innovative, competitive and comprehensive range**

We attain the goals and vision of the company through innovative products, a competitive range of products, excellent technical support and efficiency and rapidness of execution. Our advantage is that we are in constant contact with contractors, investors and end-users who are aware of the importance of quality products.

## **PRODUCTION PROGRAMME AND ACTIVITIES of the Hermi company**

Under our own Hermi® brand we provide manufacture, sales and assembly of:

**LIGHTNING PROTECTION**

**SURGE PROTECTION**

**CABLE TRAYS**

**MOUNTING SYSTEMS**

We also offer comprehensive expert technical support and consultations.

# Standards and collaboration with industry

The Hermi product programme and trade mark are protected. All our products comply with strict national standards which are harmonised with European and international standards. We have successfully conducted tests and obtained all required international certificates.

In the field of quality assurance and development of our products we cooperate with various institutions and work within the scope of relevant standards. Our collaboration with industry is very significant since it helps us develop innovations and make progress in the industry.

Our knowledge, long experience and innovative ideas enable us to fulfil the needs and wishes of our customers to have quality products for lightning and surge protection. In the field of production of cable trays and ladders we provide the highest quality which has already been recognised by design engineers, contractors and end-users. The quality of E90 cable trays is proven by successful tests of fire resistance in a certified test laboratory.

## QUALITY OF HERMI® PRODUCTS IS CONFIRMED BY INTERNATIONAL AND NATIONAL INDEPENDENT CERTIFICATION AUTHORITIES

- ISO 9001:2015
- IQNet
- ETIM International
- Expert evaluation of the M. V. Electric Power Research Institute
- Certificate of the Institute for the Electricity and Energy
- Certificate of the School of Electrical Engineering of the University of Belgrade
- Certificate of the Institute for Health Protection and Safety at Work
- Recommendations for roof coverings
- Production according to the German standard DIN 4102-12:1998 for fire resistance of cable paths

**ETIM  
International**

# Company's milestones

## 1985 The beginning

In 1985, Herman Rauter started his own company as an electrician. He focused on electrical measurements including the measurement of lightning protection installations since they were mostly poorly maintained. Fires caused by lightning were a frequent event causing great material damage. Herman Rauter saw a challenge in this: how to rebuild lightning protection with materials that would be durable and at the same time cheaper than those offered by the market.

## 1993

### Presentation of imperceptible lightning protection at an international trade fair

In cooperation with Bramac, an established roof tiles manufacturer, Herman presented his programme at the Celje International Trade Fair. In this way, architects and investors in particular were introduced to the quality and aesthetic advantages of the Hermi lightning protection programme.

## 1997

### Comprehensive range for our customers

In addition to lightning protection equipment, we also offered designing and consultations to our customers. Thus, the production, sales, installation and design of Hermi® imperceptible lightning protection have been formulated into a complete, comprehensive range. We were successful with our competitive advantage — our customers were provided complete professional solution for lightning protection.

## 2002

### New generation and expansion beyond the borders of Slovenia

After restructuring the company as a limited liability company, Herman Rauter appointed his son Miran Rauter, BEc, as its director, who developed alongside his father both commercially and professionally. That year, a new branch abroad was opened — in neighbouring Croatia.

## 1992

### Development of imperceptible and discreet lightning protection

Up to 1992 he developed new, simple products made of corrosion-resistant materials with the aim of making a lightning protection on a building imperceptible and discreet and compliant with applicable standards.

## 1994

### A new beginning in Celje

The relocation of production from Velenje to Celje contributed to the expansion of the product range.

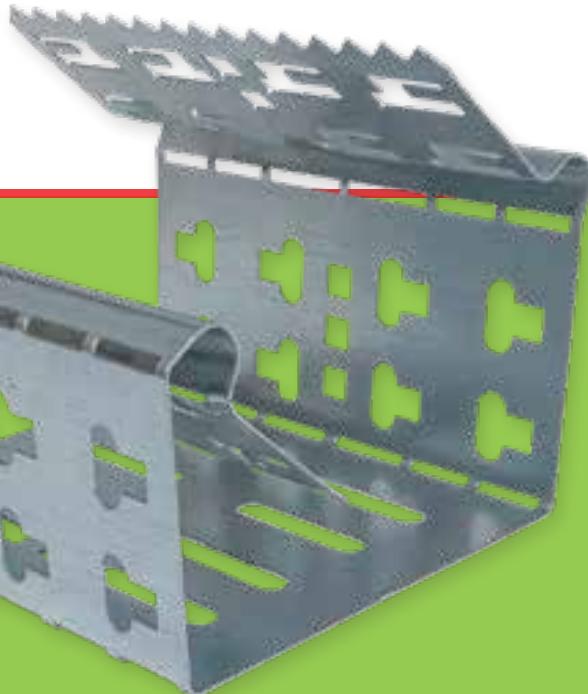

## 2001

### Expansion of production and development of the SHIELD design program

The existing building was extended and thus we improved the conditions for production and operation. Herman Rauter partnered with the profession, and they jointly developed the SHIELD computer program in order to help designers and contribute to a more effective, faster and better design of lightning and surge protection systems. The existing building was extended and thus we improved the conditions for production and operation. Herman Rauter partnered with the profession, and they jointly developed the SHIELD computer program in order to help designers and contribute to a more effective, faster and better design of lightning and surge protection systems.

### Further expansion to foreign markets

A new company in a foreign market was established, namely in Bosnia and Herzegovina.

# HERMI® Fast Joint

**HERMI® FAST JOINT IS INTENDED FOR QUICKER CONNECTION OF CABLE TRAYS WITHOUT USING BOLTS AND TOOLS, SAVING UP TO 40% OF THE TIME.**

**SUITABLE FOR JOINING TYPE-BASED AND CUT CABLE TRAYS. WITHOUT THE ADDITIONAL EQUIPOTENTIAL CONNECTION OF CABLE TRAYS.**

- **WITHOUT USING BOLTS**
- **WITHOUT USING ADDITIONAL TOOLS**
- **SAVING UP TO 40% OF INSTALLATION TIME**
- **FOR CONNECTION OF TYPE-BASED CABLE TRAYS**
- **FOR CONNECTION OF CUT CABLE TRAYS**
- **WITHOUT ADDITIONAL EQUIPOTENTIAL CONNECTION OF CABLE TRAYS**

**2006**  
**New commercial building and continuation of expansion to foreign markets**  
Due to the expansion of production, we built a new commercial building to conduct sales and storage of products. A company was established in Serbia.

**2008**  
**New markets**  
We actively entered new markets – Romania, Russia, Bulgaria, Kosovo and Macedonia.

**2011**  
**New commercial-production building in Celje**  
We built a new commercial-production building in Celje, as it was easier for us to implement the production plans and to meet the growing market demands.

**2012**  
**New commercial-production building in Croatia**  
We finished the construction of a new commercial-production building in Croatia, in the vicinity of Zagreb.

**2013**  
**New markets**  
We established a company in Romania – Hermi Protection srl. At the same time we started to be active in the Austrian and Hungarian markets too. We crossed the EU borders with projects in Saudi Arabia and other Arab States of the Gulf.

**2017**  
**Expansion of production and technological development**  
Due to increased production, we built a new facility and thus provided space for new and technologically sophisticated machines.

**> The future**  
Over the next few years we plan to build our own commercial buildings in all the countries where we already have our companies. We plan to expand our operation to those European markets where we are not present yet.  
We look to the future full of optimism – led by our goal to always be a step ahead of our customers

**2007**  
**Expansion of the range of products for surge protection systems**  
We introduced the HERMI surge protection. Thus we managed to achieve that customers select all elements for external and internal surge protection at a single point.

**2009**  
**Production automation and international product certification**  
We put a lot of energy and means into modernising and automating production and developing new products made according to European and international standards and harmonised national standards. Our products successfully underwent testing and obtained all required international certificates – also pursuant to IEC and EN standards.

**2015**  
**30th anniversary of business operation and awarded tradition**  
We celebrated 30 years of operation and received the award of the Chamber of Commerce and Industry of the Republic of Slovenia. Miran Rauter, the company director, received the award for outstanding achievements in the field of economic and entrepreneurial achievements for 2015.

**2018**  
**Expansion to the north**  
We founded a company in Austria and also entered the German market.

# HERMI CABLE TRAYS AND CABLE LADDERS

## MATERIALS

The HERMI® systems of cable trays and cable ladders are made of **quality materials**, which **enable durable** and **high quality cable paths**. The **basic version** of the cable tray is made of **quality galvanised sheet metal**, which has been subsequently perforated. These trays are **suitable for indoor, dry area use**.

The next stage of cable trays or cable ladders is made of **quality steel alloy**, which is subsequently **hot-dip galvanised**. In this case, the entire product has a quality protection from **external influences or corrosion**. The recommended use for this series of products is in **damp indoor areas and outdoors**, or in other words, in conditions that are somewhat more challenging than the previous ones.

For more demanding atmospheric conditions, we recommend the use of cable trays and cable ladders, **made of stainless steel**. This means both indoor and outdoor use. The stainless steel cable trays are especially suitable for **outdoor use**, as they are an **enduring solution for cable paths**. When the trays need to be cut during installation, **the cut edges won't corrode** and the placement remains enduring and of high quality.

Cable trays and cable ladders, **made of acid resistant stainless steel** represent the peak of the offer and are especially suited for the use in **the most demanding conditions**, such as food industry, chemical industry, purification plants, biogas plants, etc.

**Upon client request, we use powder paint to colour the shelves into the desired colour according to the RAL chart.**

In demanding conditions (food industry, paper industry,...) cable trays and cable ladders **made of aluminum** are used. They are non-corrosive, low weight and pose no threat to the environment.

### Legend:

LABEL	DESCRIPTION
■ FeZn	galvanised sheet metal (suitable for indoor use)
■ FeZn-H	hot-dip galvanised sheet metal
■ Rf	stainless steel (suitable for indoor and outdoor use)
■ FeZn - PVC	dust coloured galvanised sheet metal in the colours according to the RAL scale
■ Rf*H4	acid resistant stainless steel
■ Al	aluminum

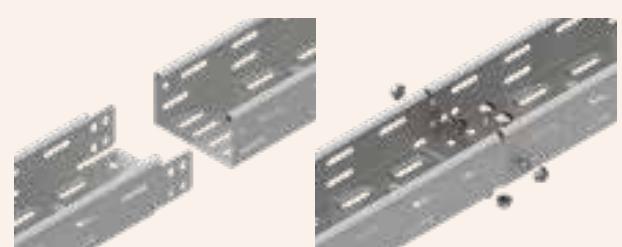

## INSTALLATION

The HERMI® systems of cable trays and cable ladders enable simple, quick and efficient installation of cable paths. Due to the construction solutions, the tray connecting is of high quality and quick and ensures a suitable galvanic connection, while the connection between trays itself will not harm the cables.

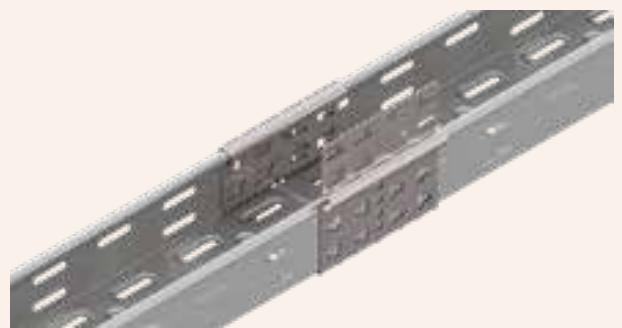

Such quality connection is made possible without an additional interconnect, which does not only mean a better and quicker construction solution, but also an economically more favourable one. The edges of the trays are curved in a way that reduces the chances of injuries during installation to a minimum.

The covers of cable trays are type-based and enable quick and simple attachment by placing the cover onto the tray alone. An accomplished groove system on the cable trays and ladders enables both suitable cooling and air circulation and provides suitable support for the click system of cover attaching.

“ The wide range of type-based brackets enables attachment of cable paths anywhere.

Quick and simple connection with only four bolts without unnecessary additional connecting elements saves time and money.

**HERMI® Fast Joint** – quick connection without the use of bolts and tools, which saves up to 40% of time.

## FLEXIBILITY

The HERMI® cable tray and cable ladder **systems** are **distinguished by a broad range of type-based elements**, which enable **quick construction of cable paths**. Most of the damage caused by installation occurs specifically during the installation of cable trays or ladders. The cause is mainly tray cutting or adjustment, whereby sharp edges are created. By using type-based interconnects (crossways, deviations, passages, knees...), additional interventions become unnecessary, thus saving valuable installation time.

## QUALITY

Along with the listed quality materials the HERMI® cable tray systems and cable ladders are made of, additional **quality is ensured by the precise and careful manufacture** and the inventive and accomplished form of the products. Along with the quality products, the planned connections are ensured with self-protected nuts and bolts, which prevent unscrewing, as well as ensure a suitable galvanic connection between the elements.

The capacity of cable trays and cable ladders depends on the number and distance between the brackets and exceeds the realistically expected loads, ensuring quality and long lasting cable paths.

The production programme also includes Cable trays, made of various thicknesses of sheet metal. Regarding loading level and area of use, they are divided to:

CLASS	DESCRIPTION
N	Cable trays suitable for normal use
M	Cable trays with increased loading level
H	Cable trays suitable for extreme areas of use

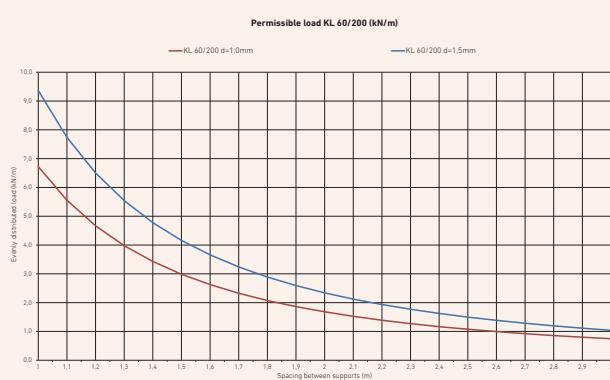

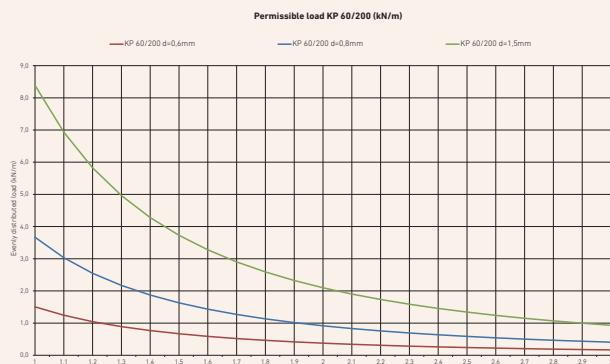

The loading level of a cable tray or ladder is the endurance of the tray or ladder with the predisposition, that suitable brackets are chosen and that they are installed on the wall or ceiling in a proper and quality manner!

### NOTES:

- Powder painting of cable trays and ladders, interconnects and brackets upon request!
- Possibility of manufacture of other dimensions of cable trays and ladders, interconnects and brackets upon request!

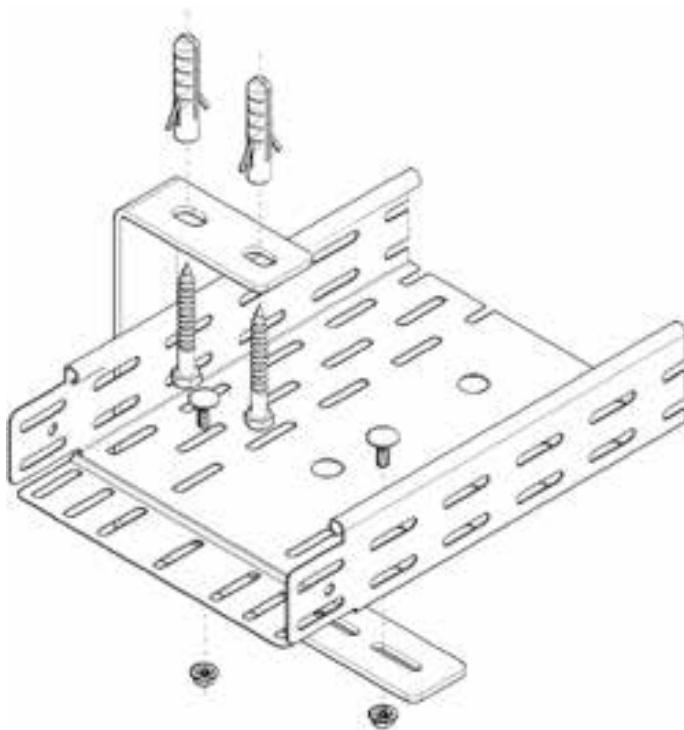

**Loading of cable trays KP 60/100 and cable ladder KL 60/200 is relative to distance between bearing elements (brackets).**

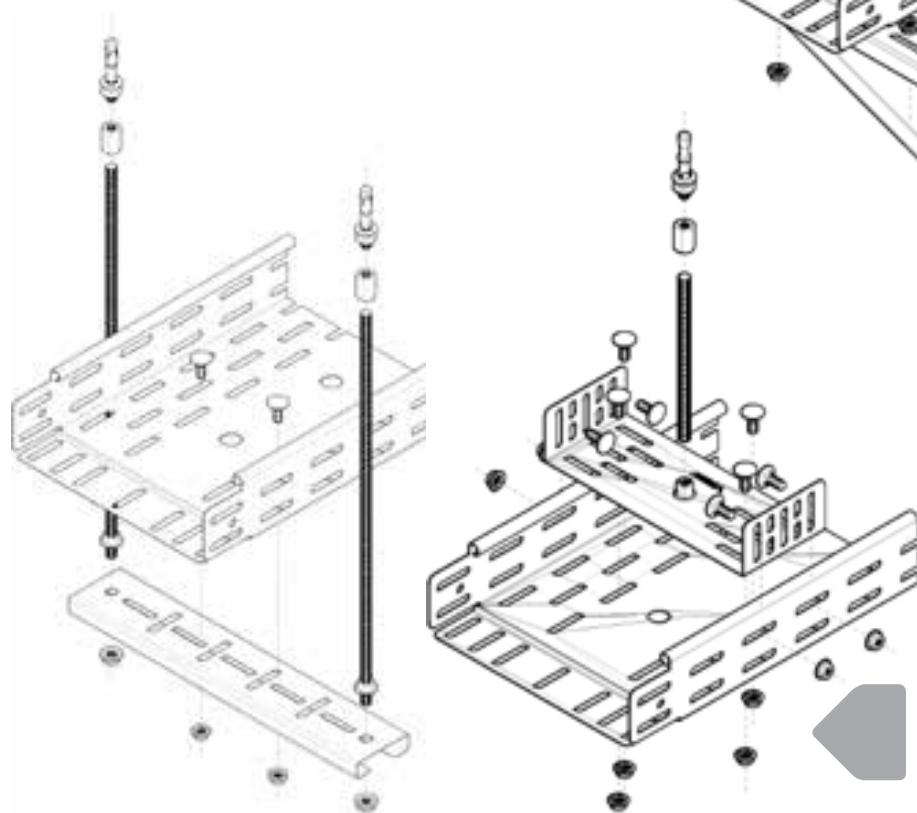

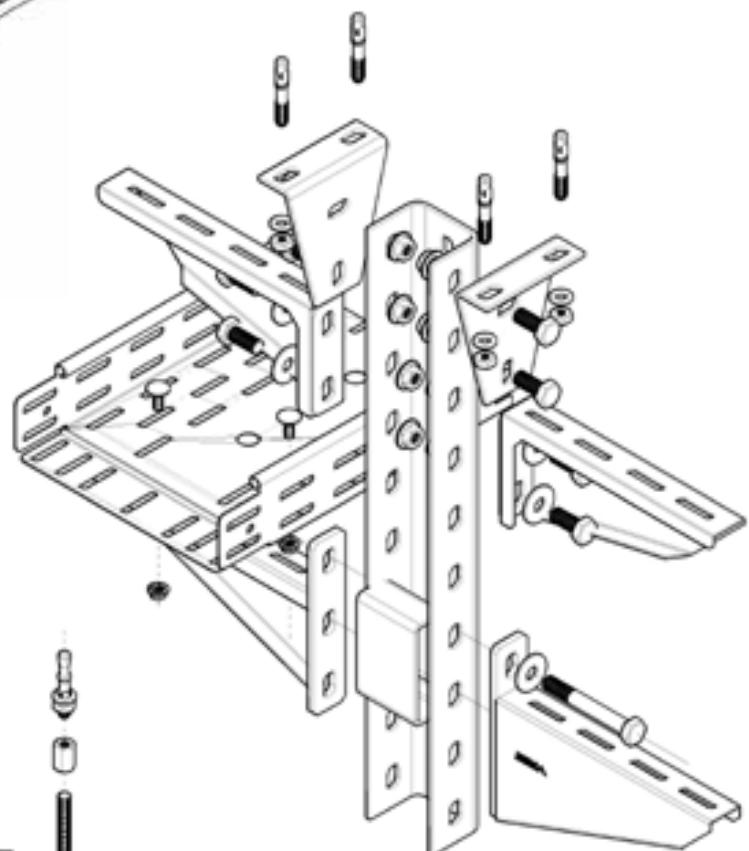

# EXAMPLES OF INSTALLATION

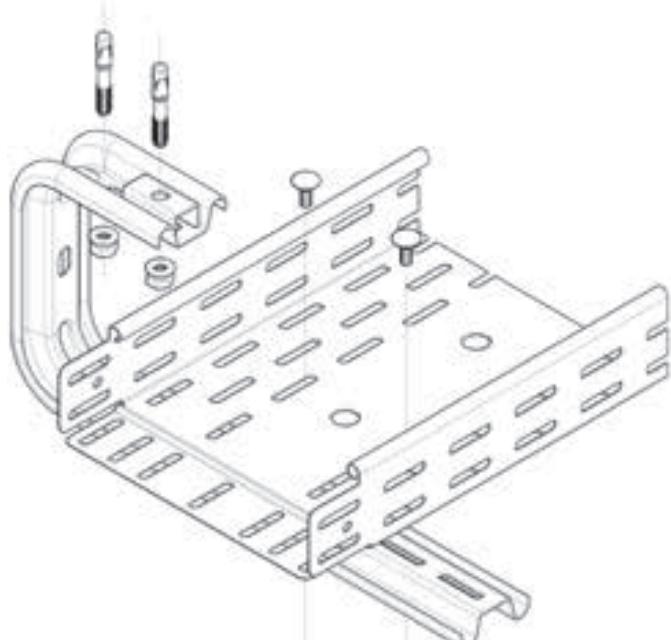

## INSTALLATION OF CABLE TRAYS ONTO THE CEILING

Cable trays are intended for the construction of cable paths in surface cable laying.

# Cable trays KP 30

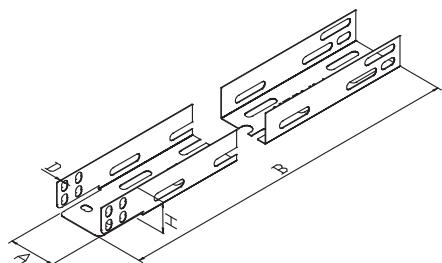

## KP 30/- Cable trays L= 2000 - 3000 mm; H= 30 mm; Class: N

Cable trays of **30 mm** in height and 50 mm in width, made of galvanised sheet metal or stainless steel, optionally powder painted in the desired colour. The length of an individual cable tray is **2,0 m** or **3,0 m**. Cable trays are mounted to the wall or ceiling with the appropriate **NKP** brackets. Joining cable trays together without additional fixing elements is carried out with **PPKP M6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts.

## KP 30/C- Cable trays L= 2000 mm; H= 30 mm; Class: N

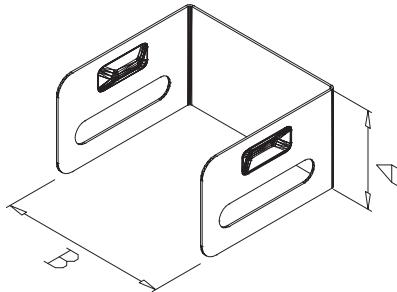

Cable trays with an edge of **30 mm** in height and 50 mm in width, made of galvanised sheet metal or stainless steel, optionally powder painted in the desired colour. The length of an individual cable tray is **2,0 m**. Other lengths upon request. Cable trays are mounted to the wall or ceiling with the appropriate **NKP** brackets. Joining cable trays together without additional fixing elements is carried out with **PPKP M6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts. Mounting with the **NKP-VN2M8 50** hanging bracket and the M8 threaded rod is most suitable. Appropriate for lightweight loads, e.g. for marking parking spaces in parking garages.

# Cable trays KP 60

## KP 60/- Cable trays; L = 2000 mm; H = 60 mm; Class: N

Cable trays of **60 mm** in height and of various widths, made of galvanised sheet metal or stainless steel, optionally powder painted in the desired colour. The length of an individual cable tray is **2,0 m**. Cable trays are mounted to the wall or ceiling with the appropriate **NKP** brackets. Joining cable trays together without additional fixing elements is carried out with **PPKP M6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts.

## &gt;&gt; Cable trays KP 60

**PKP-ZRE 60/- »Z« reduction element**

With **PKP-ZRE 60/AB/50** reduction element we reduce the width for A/B (mm) = **50 mm** (e.g. from cable tray of **100 mm** of width to **50 mm; 200 mm/150 mm**). With **PKP-ZRE 60/AB/100** reduction element we reduce the width for A/B (mm) = **100 mm** (e.g. from cable tray of 500 mm of width to 400 mm). The mounting is carried out with **PPKP M6x12** (8x) connection bolts and **PPKP M6** (8x) flange nuts.

# Cable trays KP 100

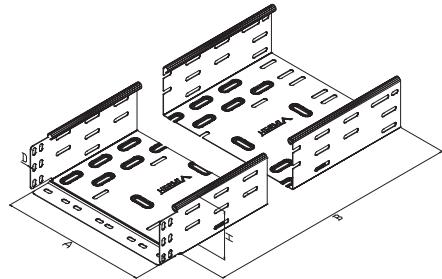

## KP 100/- Cable trays; L= 2000 mm; H= 100 mm; Class: N

Cable trays of **100 mm** in height and of various widths, made of galvanised sheet metal or stainless steel, optionally powder painted in the desired colour. The length of an individual cable tray is **2,0 m**. Cable trays are mounted to the wall or ceiling with the appropriate **NKP** brackets. Joining cable trays together without additional fixing elements is carried out with **PPKP M6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts.

# Non-perforated cable trays

## KPU 40/- Non-perforated cable trays; L= 2000 mm; H= 40 mm; Class: N

Non-perforated cable trays of **40 mm** in height and of various widths, made of galvanised sheet metal or stainless steel, optionally powder painted in the desired colour. In the basic cable tray version, the boreholes/perforations are only designed for joints and covers of cable trays. On request, different versions (e.g. without boreholes/perforations) can be made. The length of an individual cable tray is **2,0 m**. Cable trays are mounted to the wall or ceiling with the appropriate NKP brackets. Joining cable trays together without additional fixing elements is carried out with **PPKP M6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts.

## >> Non-perforated cable trays

### KPU 100/- Non-perforated cable trays; L= 2000 mm; H= 100 mm; Class: N

Non-perforated cable trays of **100 mm** in height and of various widths, made of galvanised sheet metal. In the basic cable tray version, the boreholes/perforations are only designed for joints and covers of cable trays. On request, different versions (e.g. without boreholes/perforations) can be made. The length of an individual cable tray is **2,0 m**. Cable trays are mounted to the wall or ceiling with the appropriate **NKP** brackets. Joining cable trays together without additional fixing elements is carried out with **PPKP M6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts.

# KPA ALUMINIUM CABLE TRAYS

Cable trays are intended for the construction of cable paths in surface cable laying. They are suitable for external and internal mounting, and since they are non-corrosive they are appropriate for use in demanding conditions.

**KPA 60/- Cable trays; L = 2000 mm; H = 60 mm; Class: N**

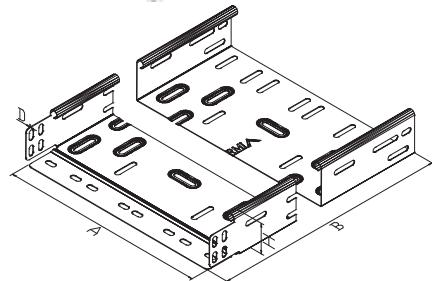

Cable trays of **60 mm** in height and of various widths, made of aluminium. The length of an individual cable tray is **2,0 m**. Cable trays are mounted to the wall or ceiling with the appropriate **NKP** brackets. Joining cable trays together without additional fixing elements is carried out with **PPKP M6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts.

**KPA 60/- Cable trays; L = 3000 mm; H = 60 mm; Class: N**

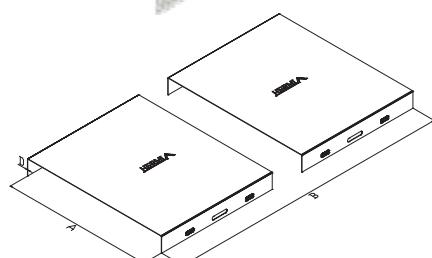

KPA Cable trays of **60 mm** in height and of various widths, made of aluminium. The length of an individual cable tray is **3,0 m**. Cable trays are mounted to the wall or ceiling with the appropriate **NKP** brackets. Joining cable trays together without additional fixing elements is carried out with **PPKPM6x12** (4x-8x) connection bolts and **PPKP M6** (4x-8x) flange nuts.

# KPM MESH CABLE TRAYS

Mesh cable trays are intended for the construction of cable paths in surface cable laying. They are designed for use in industry, particularly in environments with more demanding conditions (e.g. food industry, clean areas, etc.).

# EXAMPLE OF MESH CABLE TRAYS BRANCHING

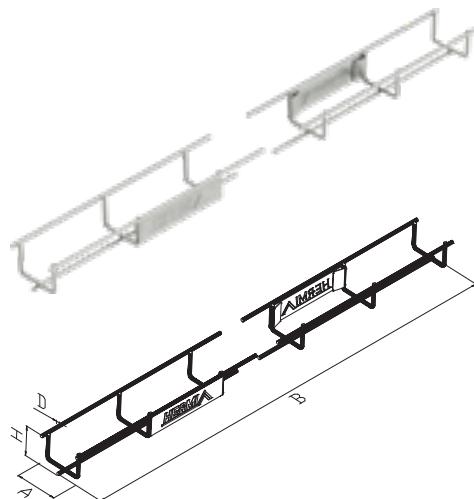

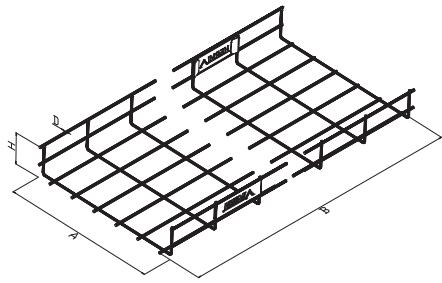

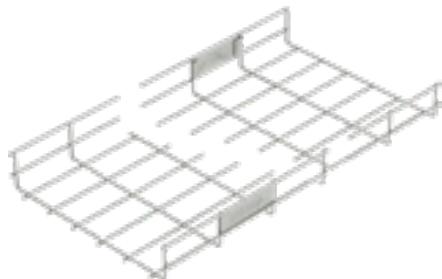

KPM – MESH  
CABLE TRAYS

## KPM 35/50 Mesh cable trays; L= 3000 mm; H= 35 mm; Class: N

KPM mesh cable trays of **35 mm** in height and 50 mm in width, made of stainless steel or galvanised sheet metal, optionally powder painted in the desired colour. The length of an individual cable tray is **3,0 m**. Mesh cable trays are attached to the wall or ceiling with suitable **NKP-SNT** brackets and with the **SPN01** clamp, **NKP-SNTM** (boltless mounting on the bracket) or the **NKP-NKM 35** (mounting on the bracket without bolting). Joining of the mesh trays is carried out using the **SPN01** clamp and making different elbows/branches with the **SPN02** clamp.

## NKP-SNT Wall bracket

The NKP-SNT wall bracket is designed for mounting cable trays and cable ladders to the wall. The use of fasteners for wall mounting depends on the type of wall material (concrete, brick, etc.). The bracket is also suitable for the mounting on the **NKP-VNV** or **NKP-VNU** hanging bracket. The bracket is appropriate for the installation together with the **PKP-VE 02** connecting element on the **NKP-UL** load-bearing profile. The recommended spacing between brackets is defined based on the load diagram.

### NKP-SNTM Wall bracket

The **NKP-SNTM** wall bracket is designed for mounting **KPM** and **KPMG** mesh cable trays to the wall. The **KPM** mesh cable trays are fixed to the bracket **WITHOUT BOLTING**. The use of fasteners for wall mounting depends on the type of wall material (concrete, brick, etc.). In addition, the bracket is also suitable for mounting on the **NKP-VNV** and **NKP-VNU** hanging brackets. The bracket is suitable for mounting together with the **PKP-VE 02** connecting element on the **NKP-UL** load-bearing profile. The recommended spacing between the brackets is determined on the basis of the load diagram.

### NKP-NKM 35 Wall bracket

The **NKP-NKM 35** wall bracket is designed for mounting **KPM 35/50** mesh cable trays to the wall. The **KPM 35/50** mesh cable trays are fixed to the bracket **WITHOUT BOLTING**.

The use of fasteners for wall mounting depends on the type of wall material (concrete, brick, etc.). The recommended spacing between the brackets is determined on the basis of the load diagram.

ITEM	MATERIAL	F <sub>max</sub> (kN)	KG/PC.	PACKAGE	PROD. CODE

### NKP-NKMA 60/50 Addition to the wall bracket

Designed for mounting **KPM 35/50** and **KPM 60/50** on a wall bracket (**NKP-SNT**,

**NKP-SNV**,...). Fastening on a bracket is done with **M6x12** bolt and **M6** flange nut.

Mounting of the KPM mesh cable tray on the bracket is done **without screwing**.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-NKMA 60/50	■ FeZn	0,02	80	<b>88707147</b>

### NKP-FEM Fixed element

The **NKP-FEM** fixed element is designed for fixed mounting of **KPM** and **KPMG** mesh cable trays to the wall. The use of fasteners for wall or floor mounting depends on the type of wall material (concrete, brick, etc.). The recommended spacing between the brackets is determined on the basis of the load diagram.

### SP01 Clamp for joining the mesh cable tray

The **SP01** clamp is designed for joining **KPM** mesh cable trays. It is made of stainless steel or galvanised sheet metal, optionally powder painted in the desired colour. The number of the **SP01** clamps required for the joint connection depends on the width of cable trays (50 mm... 2 pcs **SP01**; 100–200 mm... 3 pcs **SP01**; 300 mm... 4 pcs **SP01**; width 400–500 mm... 5 pcs **SP01**; 600 mm... 6 pcs **SP01**).

## NKP-NDM Socket holder

The **NKP-NDM** socket holder is designed for fixing the electrical socket to the **KPM** mesh cable tray. Mounting of the **NKP-NDM** holder to the **KPM** mesh cable tray is carried out without bolting. In addition, it can also be used as a wall bracket for lightweight loads. It is made of stainless steel or galvanised sheet metal, optionally powder painted in the desired colour.

# KL CABLE LADDERS

Cable ladders are intended for the construction of cable paths in surface cable laying.

# Cable ladders KL 60

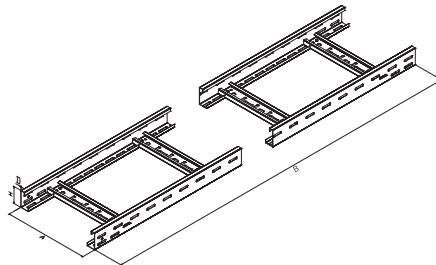

## KL 60/- Cable ladders; L= 3000 mm; H= 60 mm; Class: N

Cable ladders of **60 mm** in height and of various widths, made of galvanised sheet metal or stainless steel, optionally powder painted in the desired colour. The length of an individual cable ladder is **3,0 m**. Cable ladders are attached to the wall, ceiling or floor with the suitable **NKP** brackets. For joining two cable ladders, **2 pcs PKL-FS** are required.

# >> Cable ladders KL 60

## PKL-REL Reduction element - left; Class: N

The **PKL-REL** left reduction element is bolted on the KL cable ladder with the **PKL-FS** fixed connecting element, which is installed on the outer side with **PPKP M6x12** (8x) connection bolts and **PPKP M6** (8x) flange nuts. Delivery of other dimensions, e.g. **PKL-REL 600/200**, is also possible.

## PKL-KOB05 Cable clamp

The **PKL-KOB05** cable clamp is designed for the attachment of cables to **HERMI KL** cable ladders or **NKP-PL** perforated profiles. Cables, laid on the top side of the ladder, are fixed on the cross bar of the ladder. Using a **M6x50 bolt**, which is a part of the clamp, the cable gets fixed onto the ladder. The **PKL-KOB05** cable clamp is suitable for cables with diameters of **10-28, 28-40, 40-52, 52-64** in **64-76 mm**.

## >> Cable ladders KL 100

### KL-PR Cable ladder divider

The **KL-PR** cable ladder divider is designed for separating conductors installed in cable ladders and preventing electromagnetic interference. The cable ladder divider is installed to a cable ladder with **PPKP-M6x12** (3x) connection bolts and **PPKP-M6** (3x) flange nuts.

## **PKL-KOB05** Cable clamp

The **PKL-KOB05** cable clamp is designed for the attachment of cables to **HERMI KL** cable ladders or **NKP-PL** perforated profiles. Cables, laid on the top side of the ladder, are fixed on the cross bar of the ladder. Using a M6x50 bolt, which is a part of the clamp, the cable gets fixed onto the ladder. The **PKL-KOB05** cable clamp is suitable for cables with diameters of **10-28, 28-40, 40-52, 52-64** in **64-76** mm.

# KLA

## ALUMINIUM CABLE LADDERS

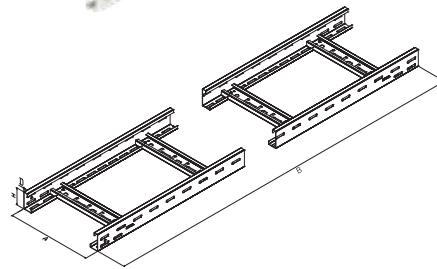

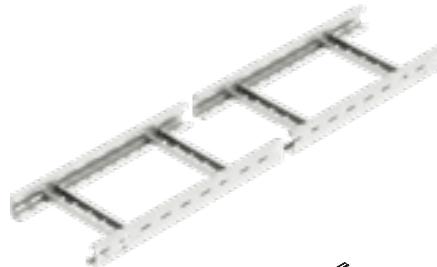

The aluminium cable ladders are intended for the construction of cable paths in surface cable laying. Because of their resistance to corrosion, they are suitable for external and internal mounting, particularly in environments with demanding conditions and for heavy-duty loads.

### KLA 60/- Cable ladders; L= 3000 mm; H= 60 mm; Class: N

The KLA cable ladders of **60 mm** in height and of different widths are made of aluminium. The length of an individual cable ladder is **3,0 m**. Cable ladders are mounted to the wall, ceiling or floor with the appropriate NKP brackets. For joining two cable ladders, **2 pcs PKLA-FS** are required.

# KL HD

## "HEAVY-DUTY" CABLE LADDERS

Cable ladders are intended for the construction of cable paths in surface cable laying. Their construction allows extreme loads, as well as large spacing between supports.

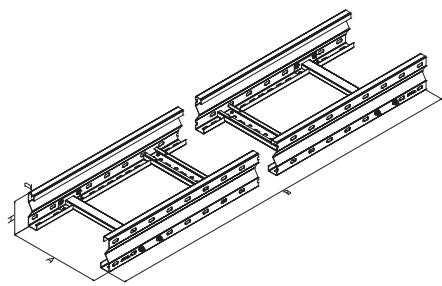

## **KL HD 100/- HD Cable ladders; L= 6000 mm; H= 100 mm; Class: H**

The **KL HD** cable ladders of **100 mm** in height and various widths are made of stainless steel or galvanised sheet metal. The length of an individual cable ladder is **6,0 m**. Cable ladders are mounted to the wall, ceiling or floor with the appropriate NKP brackets. For joining two cable ladders, **2 pcs PKL-FS HD** are required.

### NKP-SNTL Wall bracket

The **NKP-SNTL** wall bracket is designed for mounting cable trays and cable ladders to the wall. The use of fasteners for wall mounting depends on the type of wall material (concrete, brick, etc.). The bracket is also suitable for the mounting on the **NKP-VNV** or **NKP-VNU** hanging bracket. The bracket is appropriate for the installation together with the **PKP-VE 02** connecting element on the **NKP-UL** load-bearing profile. The recommended spacing between brackets is defined based on the load diagram.

### NKP-SNTD Bracket 2x110, 2x210, 2x310

The **NKP-SNTD** bracket is designed for two sided mounting of cable trays and cable ladders to the **NKP-SNU** or **NKP-VNV** bracket. The advantage of this bracket is that a single attachment provides a double/two-sided path for cable trays or cable ladders. The recommended spacing between brackets is defined based on the load diagram.

### NKP-VN1M8 50 Hanging bracket

The **NKP-VN1M8 50** hanging bracket is designed for mounting **30 mm** high cable trays with edge to the ceiling. The bracket is placed in the cable tray itself and fixed on the roof with the help of the **M8** threaded rod. The recommended spacing between the brackets is determined on the basis of the load diagram. Appropriate for lightweight loads, e.g. for marking parking spaces in parking garages.

## NKP-VNU/OMEGA Hanging bracket

The **NKP-VNU/OMEGA** hanging bracket is designed for mounting cable trays and cable ladders to the ceiling. The use of fasteners for wall mounting depends on the type of wall material (concrete, brick, etc.). The bracket is also suitable for the mounting on the **NKP-VNV** or **NKP-VNU** hanging bracket. The recommended spacing between the brackets is determined on the basis of the load diagram.

### NKP-SNU/P1 Hanging bracket

The **NKP-SNU/P1** hanging bracket is designed for mounting cable trays to the ceiling. Adjustable to the ceiling plane. The bracket is fixed to the ceiling using four bolts on which the wall bracket (**NKP-SNT**, **NKP-SNTD**) is mounted as a support element of the cable tray and cable ladder. The use of fasteners for ceiling mounting depends on the type of wall material (concrete, brick, etc.). The recommended spacing between the brackets is determined on the basis of the load diagram.

## NKP-UL/P Hanging bracket

The **NKP-UL/P** hanging bracket is designed for mounting cable trays to the ceiling. The bracket is fixed to the ceiling using four bolts on which the wall bracket **NKP-SNT** is mounted as a support element of the cable tray. With the help of the **NKP-VE 02A** connecting element, the appropriate height for mounting the cable tray is adjusted. It is suitable for lightweight loads. The use of fasteners for ceiling mounting depends on the type of wall material (concrete, brick, etc.). The recommended spacing between the brackets is determined on the basis of the load diagram.

### NKP-SNU Hanging bracket

The **NKP-SNU** hanging bracket is designed for mounting cable trays and cable ladders to the ceiling. The bracket is attached to the ceiling along with **NKP-SNP** (ceiling bracket fixing element). The wall brackets (**NKP-SNT**, **NKP-SNTD**) are bolted to the **NKP-SNU** bracket as the carrying elements of the cable tray and cable ladder. Since the fixing element on the bracket is not fixed, a longer **NKP-SNU** bracket, e.g. 2000 mm, can be used for two 1000 mm brackets (by cutting). The recommended spacing between brackets is defined based on the load diagram.

### ZP-VNV/SNU Protective caps

Protective caps are intended to cover the ends of supports or profiles of cable trays. It is made of plastic and gives a professional appearance. The protective caps are perfectly adapted to products of the HERMI® cable trays program and allows easy installation.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
ZP-VNV/SNU	LDPE	0,01	50	<b>88706505</b>

### NKP-SNP Fixing element for the SNU ceiling bracket

The **NKP-SNP** ceiling bracket fixing element is used to mount the **NKP-SNU** bracket to the ceiling. The use of fasteners for ceiling mounting depends on the type of ceiling material (concrete, brick, etc.). Cutouts on the bracket enable a precise installation of the SNU bracket even if the surface of the ceiling is not entirely straight. To attach the bracket to the ceiling, two sets of **NKP-SNP** are required. One set also includes the fasteners (2x bolt + 2x nut). The recommended spacing between brackets is defined based on the load diagram.

## NKP-NK Corner bracket

The **NKP-NK** corner bracket is designed for mounting cable trays and ladders to the floor or wall as a distancing element. Two brackets are required for mounting. The use of fasteners for ceiling mounting depends on the type of ceiling material (concrete, brick, etc.). The recommended spacing between brackets is defined based on the load diagram.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-NK	■ FeZn	0,13	100	<b>88704139</b>
NKP-NK	■ Rf	0,13	100	<b>88704239</b>
NKP-NK	■ FeZn-H	0,14	100	<b>88704639</b>

## NKP-UL 24/35/2000 Profile

The **NKP-UL** load-bearing profile is designed for mounting cable trays and cable ladders to the ceiling. The use of fasteners for ceiling mounting depends on the type of ceiling material (concrete, brick, etc.). The **NKP-SNT** brackets are attached to the **NKP-UL** profile with the help of the **PKP-VE 02** or **PKP-VE 02A** connecting element, which enables the attachment of the **NKP-SNT** bracket at various heights. The advantage is emphasized when there are several parallel rows of cable trays – the exact setting of height, less drilling into the wall. The **NKP-UL** profile may also be used for other purposes, e.g. for mounting shelves to steel profiles, mounting lights etc.

### NKP-PL Perforated profile

The **NKP-PL** perforated profile is used in combination with other elements for mounting cable trays and cable ladders to the walls, ceilings or steel profiles. In combination with **PKL-OB** (cable clamp), cables can get attached to various surfaces. Together with threaded rods it can be used as a hanging bracket. The **NKP-PL** perforated profile can also be used for various other purposes.

### NKP-U Holder 41-M10

Clamping element for bi-lateral attachment of crossbars to steel beams, independent from the channel's opening. To be used in pairs. Length calculation = Beam/Girder flange thickness + min. 2 x 50 mm overhang. For safe use, the length of the profile extending beyond the end of the bracket must be at least 50 mm.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-U Holder 41-M10	■ FeZn	0,41	20	<b>88707240</b>

### NKP-U Holder TCS 0 M8/M10

Heavy-duty connection element which, in combination with M10 bolt, is suitable for mounting to steel beams (I-, T-, U- and angle steel beams).

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-spona za nosilce TCS 0 M8/M10	■ FeZn	0,14	50	<b>88707241</b>

### NKP-Holding bracket B 41/10

Safety element for profiles to be used instead of simple washers. The Holding Bracket prevents the edges along the opening of the channels from bending and ensures optimum load distribution. When loads are imposing along the channels, holding bracket provides additional safety due to embossed teeth, which penetrate the profile. Special blanking guarantees high security and shear force after achieving form closure, especially for screwed through connecting elements.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-Holding bracket B 41/10	■ FeZn	0,07	100	<b>88707242</b>

### NKP-T Head bolt HZ41 M10x55

For easier and adjustable mounting to profiles. When loads are imposing along the channels, holding bracket provides additional safety due to embossed teeth, which penetrate the profile.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-T Head bolt HZ41 M10x55	■ FeZn	0,10	50	<b>88707243</b>

### NKP-Channel Nut C M10 41mm

When loads are imposing along the channels, holding bracket provides additional safety due to embossed teeth, which penetrate the profile. Suitable for all profiles of 41 mm width. No jamming when pushing. Possible combination with further system products. There is no settling behaviour after installation. For installation in vertical channels, we recommend the use of a speed nut with a spring.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-Channel nut C M10 41mm	■ FeZn	0,03	50	<b>88707244</b>

### NKP-Speed Nut CC HZ41 M10-spring

Particularly useful when installing in vertical channels or in places of difficult access. Suitable for all profiles of 41 mm width. Mounting by exerting slight centric pressure on it without using tools. No jamming when pushing. Possible combination with further system products. There is no settling behaviour after installation.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-Speed nut CC HZ41 M10-spring	■ FeZn	0,03	50	<b>88707245</b>

### NKP-ND Socket holder

The **NKP-ND** socket holder is designed for fixing the electrical socket to the **KP** cable trays. Mounting of the **NKP-ND** holder to the **KP** cable tray is carried out with **PPKP M6x12** (2x) bolt and **PPKP M6** (2x) flange nut. It is made of stainless steel or galvanised sheet metal, optionally powder painted in the desired colour.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
NKP-ND	■ FeZn	0,07	100	<b>88707202</b>

NKP-ND	■ FeZn-H	0,12	100	<b>88718902</b>

# PPKP

## MOUNTING ACCESSORIES FOR CABLE TRAYS AND LADDERS

The PPKP mounting accessories are intended to connect cable trays and cable ladders, attach cable ladders and trays to the brackets and the brackets to the wall or ceiling. With the use of fasteners, the installation of cable trays and ladders is quick and simple.

# PPKP Fasteners for cable trays, cable ladders and connecting elements

## PPKP - M6X12, PPKP-M6X20 and PPKP-M8X16 bolt

The **PPKP-M6X12**, **PPKP-M6X16**, **PPKP-M6X20** and **PPKP-M8X16** bolt, together with suitable flange nut are intended for the connection of cable trays and cable ladders, attachment of cable trays and cable ladders to the brackets and the connection of all connecting elements.

## FIRE RESISTANT CABLE TRAYS AND LADDERS

## MATERIALS

Cable tray and cable ladder systems HERMI® are made of quality materials, which enable a lasting and quality construction of a cable route. The cable trays are made of quality galvanized sheet metal, which is subsequently perforated. These cable trays are appropriate for use indoors, in dry spaces.

### Legend:

LABEL	DESCRIPTION
■ FeZn	galvanized sheet metal
■ FeZn-H	hot galvanized sheet metal
■ Rf	stainless steel
■ Rf*H4	acid resistant stainless steel

## INSTALLATION

Cable tray and cable ladder systems HERMI® enable a simple, quick and efficient placement of cable routes. Due to construction solutions, the connecting of cable trays is of high quality and fast, ensures a suitable galvanic connection, while the connection between the cable trays itself does not damage cables. The edges of the trays are curved in a way which reduces the chance of damage during installation to a minimum.

The cable tray covers are typical based and enable a quick and simple attachment with placement of the cover onto a tray alone. An accomplished system of grooves on the cable trays or ladders enables efficient cooling or air circulation, as well as a suitable support to the click system of cover attachment.

A broad range of typical bearing components allows the fixing of cable trays anywhere.

## QUALITY

Along with the listed quality materials, which the cable tray and cable route systems HERMI® are made of, additional quality is ensured by a precise and thorough manufacture, as well as a creative and accomplished shape of the products. Quality products are planned along with connections, secured with the use of bolts and nuts, which are protected from unscrewing and, at the same time, ensure a suitable galvanic connection between elements themselves.

The quality of cable trays **HERMI E90** is proven with a successfully passed testing of fire resistance in a certified testing laboratory.

There is a possibility of production of other cable tray and ladder dimensions, as well as connecting and bearing elements, by individual order.

# CREATION OF FIRE RESISTANT CABLE PATHS

Safety is one of our primary concerns. We can only achieve a suitable level of safety by knowing the conditions in critical situations. This also holds true in the field of fire safety, where we must ensure the uninhibited operation of certain devices in case of a fire.

Thus the power supply of fire safety devices is ensured with the use and appropriate installation of fire resistant cables, as well as the use of a suitable fire protection for said cables. To achieve appropriate levels, we use the German standard **DIN 4102-12:1998: Brandverhalten von Baustoffen und Bauteilen - Teil 12: Funktionserhalt von elektrischen Kabelanlagen; Anforderungen und Prüfungen** as a reference. A common European EN standard for fire resistance of cable routes does not yet exist.

The German standard specifies the entire system of cable routes, accessories and cables, tested together in a test chamber for 30, 60 or 90 minutes at the temperatures around 1000°C. The test thus confirms, that a system ensures uninterrupted operation of the fire safety devices (emergency lighting, fans, fire escapes, fire alarms,...), as it takes actual fire conditions into consideration, both in terms of temperature, as well as mechanical load due to expansion from temperature and metal mass expansion from temperature. During the test, we thus constantly check, whether a short circuit or a break in supply has occurred. Thereby the cable route is placed in the test chamber in the same way as it will also be installed in practice.

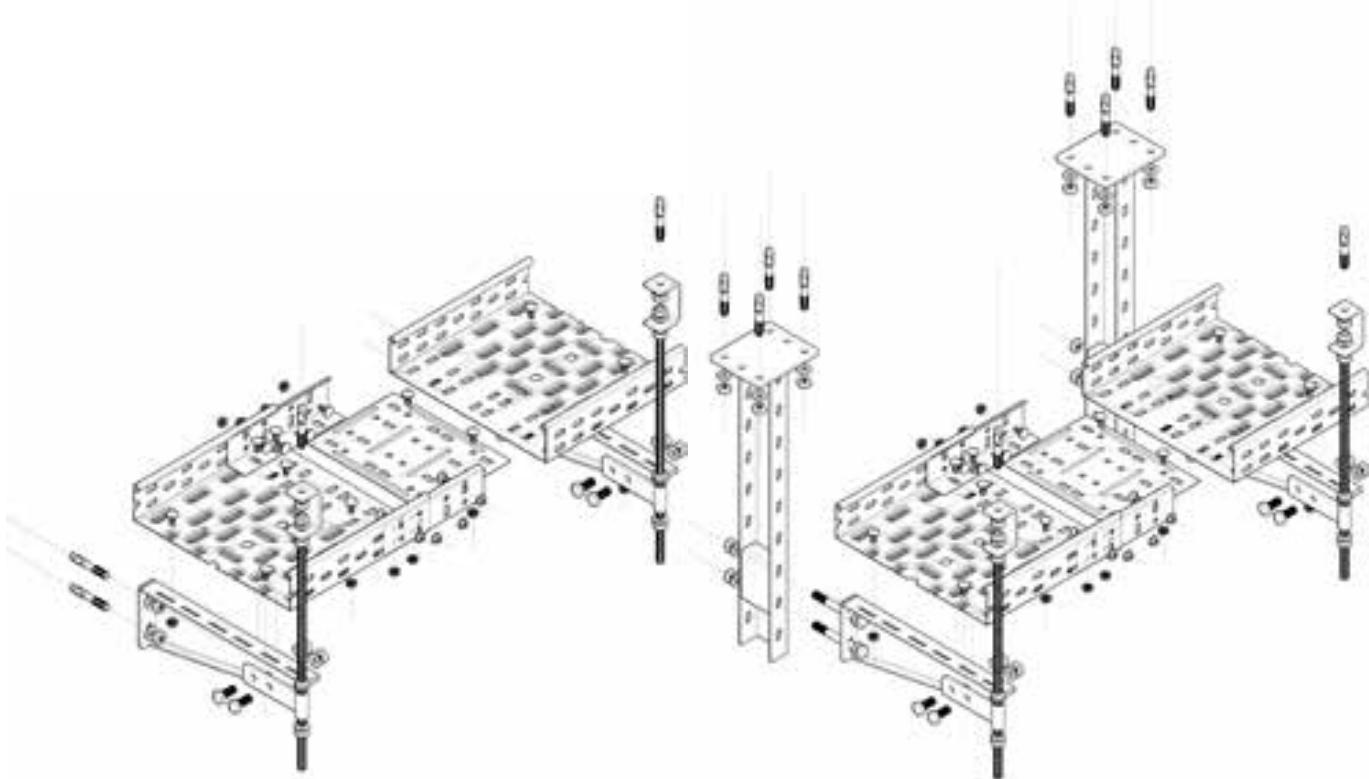

Testing of cable path system in the test chamber

Appearance of path route after completed testing in the test chamber

# KP Cable trays E90

Cable trays are intended for the assembly of fire resistant cable paths in case of surface laying of cables. The cable paths are created in a standard or light version.

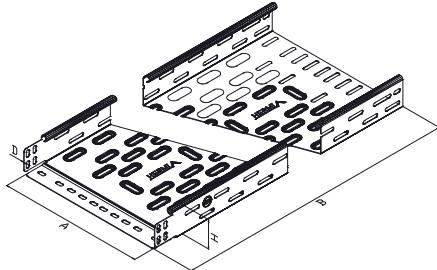

## KP 60/- E90 Cable trays; L= 2000 mm; H= 60 mm;

Cable trays of a **60 mm** height, various widths 100, 200 or 300 mm, made of galvanized sheet metal, length of individual cable tray is **2.0 m**. The cable trays are attached to a wall or ceiling with suitable bearing components **NKP** compliant with installation instructions. Connection of cable trays is carried out with the use of appropriate connection elements, **PPKP M8x16** (8x) bolts, and a nut with flange **PPKP M8** (8x).

# KL Cable ladders E90

## KL CABLE LADDERS E90 – STANDARD

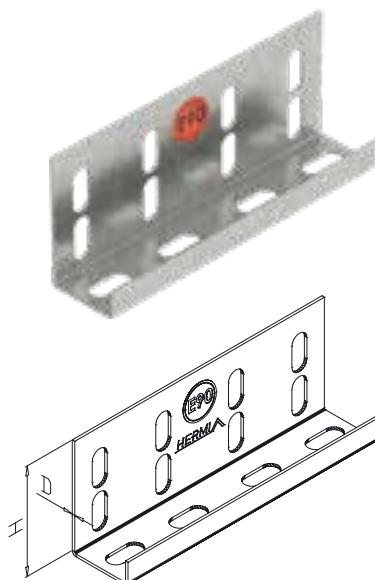

Cable ladders are intended for the assembly of standard version of fire resistant cable paths in case of surface laying of cables.

### KL 60/- E90 Cable ladders; L= 3000 mm; H= 60 mm

Cable ladders of **60 mm** in height and of various widths, made of galvanised sheet metal. The length of an individual cable ladder is **3,0 m**. Cable ladders are attached to the wall or ceiling with the suitable **NKP** brackets compliant with installation instructions. Connection of cable ladders is carried out with the use of appropriate connection elements, **PPKP M8x16** (8x) bolts and **PPKP M8** (8x) flange nuts.

# >> KL Cable ladders E90

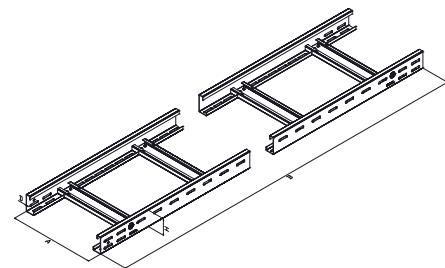

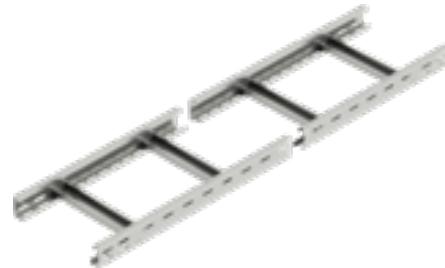

## KL CABLE LADDERS E90 – LIGHT

Cable ladders are intended for the assembly of light version of fire resistant cable paths in case of surface laying of cables.

### KL 60/...-A E90 Cable ladders; L= 3000 mm; H= 60 mm

Cable ladders of **60 mm** in height and of various widths, made of galvanised sheet metal. The length of an individual cable ladder is **3,0 m**. Cable ladders are attached to the wall or ceiling with the suitable **NKP** brackets compliant with installation instructions. Connection of cable ladders is carried out with the use of appropriate connection elements, **PPKP M6x12** (8x) bolts and **PPKP M6** (8x) flange nuts.

# NKP bearing elements

Bearing elements of fire resistant cable trays and cable ladders are intended for the attachment of cable routes to the wall or ceiling. The bearing elements are adapted to various widths of cable trays.

## NKP-SNV E90 Welded wall bracket

The welded wall support **NKP-SNV E90** is intended for the installation of cable trays and cable ladders onto a wall. The maximum distance between supports is 1200 mm or 1500 mm for the light cable route version.

## NKP-VNV E90 Welded hanging bracket

Welded hanging support **NKP-VNV E90** for the installation of cable trays onto the ceiling. The support is attached onto the ceiling with four screws, then the wall support (**NKP-SNV**) is attached to it as a carrying element of the cable tray. Maximum distance between supports is 1200 mm or 1500 mm for the light cable route version.

flange nut PPKP – M8	■ FeZn	0,01	100	<b>88705112</b>
flange nut PPKP – M8	■ Rf	0,01	100	<b>88706112</b>
flange nut PPKP – M8	■ Rf*H4	0,01	100	<b>88706412</b>

## PPKP – M10x25

The **PPKP-M8X16**, **PPKP-M8X25** and **PPKP-M10X25** bolt, together with suitable nut and (wide) washer are designed for mounting **NKP** brackets, such as the **NKP-SNT** wall bracket to the **NKP-VNU** hanging bracket.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
bolt PPKP – M10x25	■ FeZn	0,02	100	<b>88705108</b>
bolt PPKP – M10x25	■ Rf	0,02	100	<b>88706108</b>
bolt PPKP – M10x25	■ Rf*H4	0,02	100	<b>88706408</b>

## PPKP-M10

The **PPKP-M6**, **PPKP-M8** and **PPKP-M10** flange nuts, together with suitable connecting bolt are intended for the connection of cable trays and cable ladders, attachment of cable trays and cable ladders to the brackets and the connection of all connecting elements.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
flange nut PPKP – M10	■ FeZn	0,01	500	<b>88705109</b>
flange nut PPKP – M10	■ Rf	0,01	100	<b>88706109</b>
flange nut PPKP – M10	■ Rf*H4	0,01	500	<b>88706409</b>

## PPKP THREADED FASTENERS FOR INTERCONNECTING ELEMENTS

### PPKP – M6x50 E90

The **PPKP-M6x50 E90** anchor bolt is designed for mounting **NKP** brackets to the walls or ceiling with a concrete basis of the building for heavier loads. The appropriate fasteners depend on the base and load of cable trays and cable ladders.

ITEM	MATERIAL	PACKAGE	PROD. CODE
anchor bolt PPKP – M6x50 E90	■ FeZn	100	<b>88805112</b>
anchor bolt PPKP – M6x50 E90	■ Rf	100	<b>88806112</b>

### PPKP – M8x75 E90

The **PPKP-M8x75 E90** anchor bolt is designed for mounting **NKP** brackets to the walls or ceiling with a concrete basis of the building for heavier loads. The appropriate fasteners depend on the base and load of cable trays and cable ladders.

ITEM	MATERIAL	PACKAGE	PROD. CODE
anchor bolt PPKP – M8x75 E90	■ FeZn	100	<b>88805114</b>
anchor bolt PPKP – M8x75 E90	■ Rf	100	<b>88806114</b>
anchor bolt PPKP – M8x75 E90	■ Rf*H4	100	<b>88806414</b>

### PPKP – M10x100 E90

The **PPKP-M10x100 E90** anchor bolt is designed for mounting **NKP** brackets to the walls or ceiling with a concrete basis of the building for heavier loads. The appropriate fasteners depend on the base and load of cable trays and cable ladders.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
anchor bolt PPKP – M10x100 E90	■ FeZn	0,07	100	<b>88805111</b>
anchor bolt PPKP – M10x100 E90	■ Rf		100	<b>88806111</b>

### PPKP – M8

The **PPKP-M8** and **PPKP-M10** high nuts are designed for mounting **PPKP-M8** or **PPKP-M10** threaded rods to the **PPKP-M8x60** or **PPKP-M10x70** anchor bolts in the case of a hanging installation of the cable trays. They can also be used to extend threaded rods. The appropriate fasteners depend on the base and load of cable trays and cable ladders.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
high nut PPKP - M8	■ FeZn	0,02	100	<b>88705104</b>
high nut PPKP - M8	■ Rf	0,02	100	<b>88706104</b>

# >> PPKP attachment accessories

## PPKP – M10

The **PPKP-M8** and **PPKP-M10** high nuts are designed for mounting **PPKP-M8** or **PPKP-M10** threaded rods to the **PPKP-M8x60** or **PPKP-M10x70** anchor bolts in the case of a hanging installation of the cable trays. They can also be used to extend threaded rods. The appropriate fasteners depend on the base and load of cable trays and cable ladders.

high nut PPKP – M10	■ FeZn	0,02	50	<b>88705117</b>
high nut PPKP – M10	■ Rf	0,02	50	<b>88706117</b>

## PPKP – M8x1000

The **PPKP-M6**, **PPKP-M8** and **PPKP-M10** threaded rods with different lengths are together with the appropriate **PPKP-M8** and **PPKP-M10** high nut designed for mounting to anchor bolt **PPKP-M8X60** or **PPKP-M10X75** in case of hanging mounting of cable trays. The appropriate fasteners depend on the base and load of cable trays and cable ladders.

ITEM	MATERIAL	KG/PC.	PACKAGE	PROD. CODE
threaded rod PPKP - M8x1000	■ FeZn	0,31	25	<b>88705105</b>

## LIGHTNING PROTECTION

Lightning protection installation protects a building against direct lightning strikes. Only correctly positioned lightning protection conductors on a building are intended to conduct lightning current, not damaging the building. By installing lightning protection we successfully protect a building against mechanical damage or fire.

Hermi lightning protection systems have low, standard fasteners adapted to all types of roof coverings and are creatively adjusted to the architecture of the building. They are made of durable materials – stainless steel, copper or aluminium – and provide the highest level of protection against damages caused by lightning strikes.

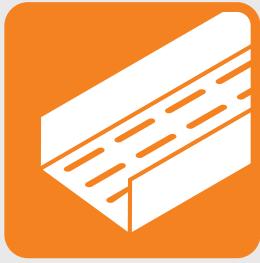

## SURGE PROTECTION

Protection which effectively protects the electrical installations and equipment in the building is called surge protection – protection of electrical installations and data lines against overvoltages.

Correctly installed surge protection does not protect the building against a direct lightning strike, but only electrical installations in it.

Hermi surge protection provides quality protection of your devices with three levels of surge protecting elements. We produce surge protection for low-voltage electrical installations, photovoltaic systems, IT systems, computer networks, video system and coaxial cables for high-frequency applications.

## CABLE TRAYS AND CABLE LADDERS

They are made of quality materials which provide sustainable and quality cable paths. The range includes many options and colours depending on the environment and investor's wishes. We also offer fire-resistant E90 cable trays.

They are distinguished for their simple, quick and efficient installation, quality coupling, rounded tray edges, type covers, sophisticated system of perforation, wide selection of standard elements, different thickness of metal sheet, precise and careful production and ingenious shape.

The highlight of the range are cable trays and cable ladders made of acid-resistant stainless steel which are suitable for use in the most demanding conditions.

## MOUNTING SYSTEMS

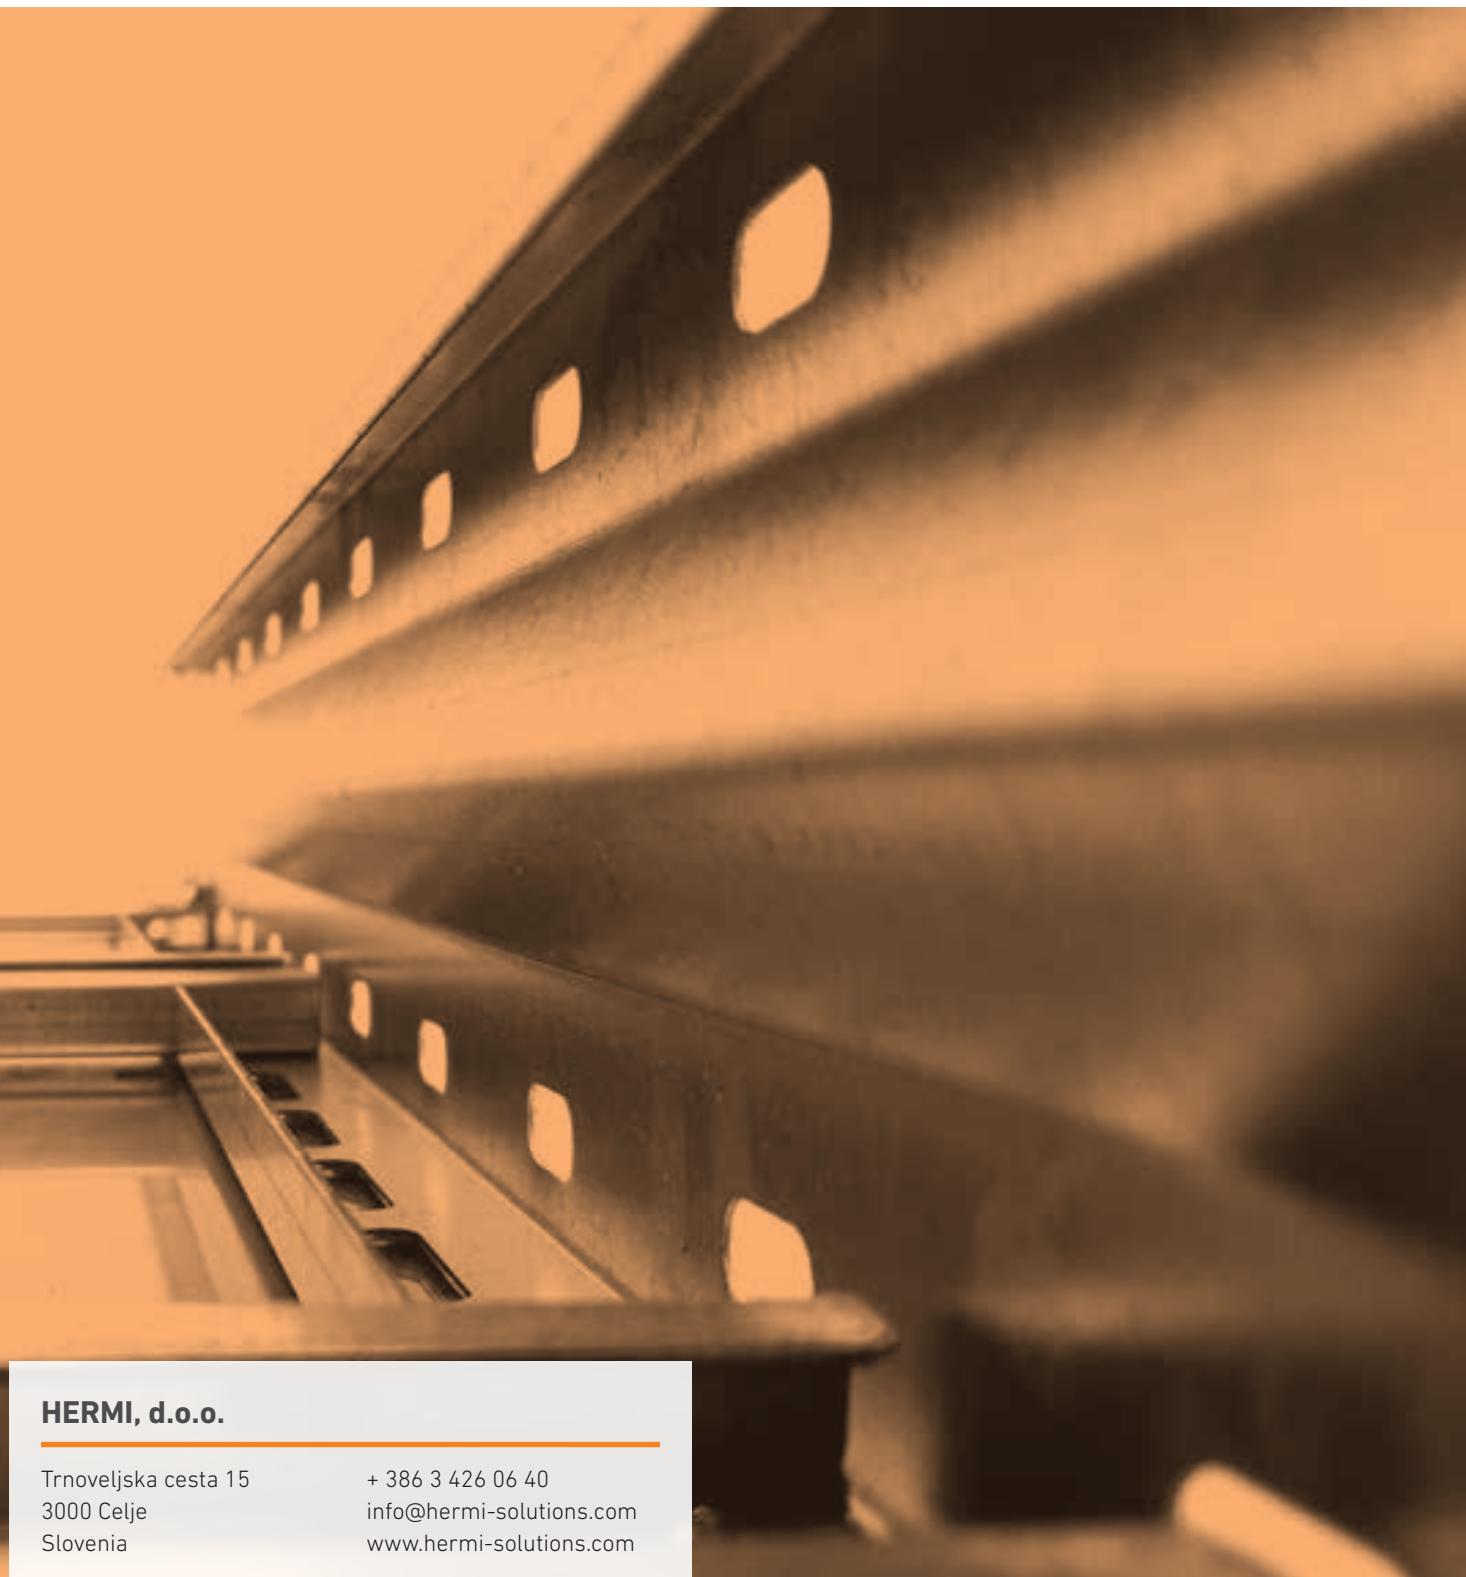

HERMI mounting systems are designed for rapid, simple and efficient installation of structures. The sub-structure of a solar power station encompasses load bearing construction profiles, roof fasteners and connecting/mounting profiles. The joining of elements is performed using screw connections which provide the adjustment of sub-structure or levelling of uneven parts of the roof.

Elements are made of quality stainless steel and aluminium.

Power of Nature, Supremacy of Knowledge
